SMARTER  
**Intrusion Detection**

## EXPERIENCE

# Smarter Intrusion Detection

Sleep better knowing your business is protected with intrusion detection from Alarm.com for Business. Enhance commercial property protection, eliminate common security system frustrations and never worry if your system has been left unarmed again.

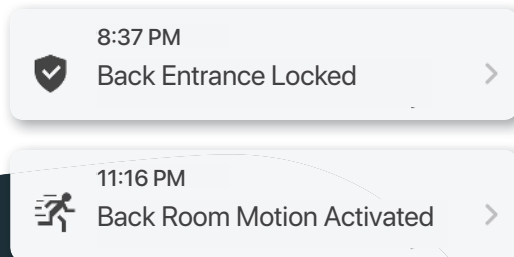

## Work Smarter, Not Harder

Make tedious tasks a thing of the past. Easily add, remove or update user codes and manage your monitoring station emergency contact list from your phone or the web dashboard. Make onboarding and offboarding a cinch with the ability to create codes in batches and set automatic expiration dates.

## Keep Your Eyes Wide Open

Stay in the loop from anywhere, anytime, with the Alarm.com mobile app or web dashboard. If a door or window sensor is triggered, you'll receive a video alert and you can quickly verify if it's a false alarm or real emergency.

Was there activity in a restricted area? Was the back door left open? Stay on top of operations even when the alarm is disarmed.

## Best-In-Class Intrusion Detection

Reliable security and automation ensures your business, inventory and equipment are always protected. Keep your system safe with robust data and network security including end-to-end encrypted traffic and two-factor authentication. Get continuous protection with automatic arming and dual path communication.

## Better Together

On its own, intrusion detection from Alarm.com is a powerful tool for keeping your business safe. But combine it with access control and video surveillance for a total security solution that's more than the sum of its parts.

Control and manage your security system for multiple properties from one app or web dashboard and receive valuable business insights.
